

**Link to architectural diagram:**

<https://lucid.app/lucidchart/invitations/accept/2882d9ba-0aab-4d31-b025-b5b71394e45d>

**Completed Features:**

- Map is present in the website
- Sign-in/sign-up is present in the website.
- Contact us page is functional
- A MySQL database was created to maintain locations in the map.

**Worked during the demo:**

- Users are able to access maps if need be.
- Contact us page is successfully able to communicate with the website owners
- Resources page and home page are present.
- Front end looks good, it is presentable

**Issues encountered during development or demo:**

- Need more work on the MySql integration with map
- The website has a resizing bug that obscures features of the website when resizing the window

**Suggestions by TA:**

- Users should be able to suggest and add more locations
- All tables should be in the same database
- Mork work should be done for the database

**Teammate Contributions:**

- Maigh: Database for map
- Ryan: Login page
- Cal: Contact Us Form
- Ethan: Overall layout of the website, map integration
- Wayne: Resources page
